OFFICE ACTION

Election/Restriction

1. This invention application contains claims directed to *two* patentably distinct species:

Group A (1-14): An electroplating process [class 438, subclass 678]

Group B (15-20): An interconnect manufacturing method [class 438, subclass 654].

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Applicant must choose one species from each of Groups A and B, because of Group B claiming an interconnect method comprises the step of forming an interconnect in a dielectric layer over transistor devices, which is omitted in Group A.

2. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and must include an election of the invention to be examined even though the requirement is traversed (37CFR 1.143).

3. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
